

# KIDS SUMMER PROGRAMME

## 28 June - 16 July 2021

	AM 9am-12pm	Fee	PM 12:30-3:30pm	Fee
<b>Week 1</b> 28/6-2/7 (4 Days)	Mandarin (5 – 8 years old)	\$1200	Inquiring Minds “Jurassic Park” (5-12 years old)	\$2000
	Crafty Creations & The Handiwork Studio (5-12 years old)	\$1200	Let’s Dance (5-12 years old)	\$1200
	Let’s Dance (5-12 years old)	\$1200		
	AM 9am-12pm	Fee	PM 12:30-3:30pm	Fee
<b>Week 2</b> 5/7-9/7 (5 Days)	Mandarin (9 – 12 years old)	\$1500	Inquiring Minds “World War 2” (5-12 years old)	\$2500
	Crafty Creations & The Handiwork Studio (5-12 years old)	\$1500	Science Nerds – STEM LAB (6-8 years old)	\$2100
	Let’s Dance (5-12 years old)	\$1500	Let’s Dance (5-12 years old)	\$1500
	AM 9am-12pm	Fee	PM 12:30-3:30pm	Fee
<b>Week 3</b> 12/7-16/7 (5 Days)	Let’s Dance (5-12 years old)	\$1500	Inquiring Minds “SPACE” (5-12 years old)	\$2500
	Science Nerds – STEM LAB (9-12 years old)	\$2100	Let’s Dance (5-12 years old)	\$1500

Location: Discovery Mind Primary School, Tung Chung Campus  
 Bus Service: Between Discovery Bay and Tung Chung (First come first served)  
 Enquiry: 2915 0666  
 Sign Up Before 11 June: Scan the QR code / visit [www.discoverymind.edu.hk/summercamp](http://www.discoverymind.edu.hk/summercamp)

# Activities Overview

## Crafty Creations & The Handiwork Studio

Creativity and imagination go hand in hand with each other and since kids have a very powerful imagination, they can put it to good use with sewing and art.

Creations and Handiwork are meaningful and valuable skills. They offer children a way to live a balanced life! Creations and Handiwork can be tools for teaching important life skills such as perseverance, concentration, self-confidence, patience, communication, and creativity. On top of that, they can provide educational, physical and mental benefits in an interesting and fun way.

This summer class is designed for our children to help develop their fine motor skills, mature their finger dexterity, strengthen their hand muscles as well as hand-eye coordination.

Our classes are created to learn sewing as a process, rather than merely focusing on the finished product. We will be having fun and engaging in a step-by-step approach through measuring and cutting techniques, threading and sewing, initial stitching, basic stitches, sewing buttons, corner bookmark, handmade gifts, hand warmers, fabric collage using applique and many more fun related activities.

There will also be a Brother electric sewing machine for the kids to see, feel, and understand the functioning of.

Our classes also provide children opportunities to explore different dimensions of art. Participants will investigate basic art techniques, such as drawing, painting, collage, ceramics, printmaking, and paper mâché. By creating delightful artwork with a wide variety of art materials, kids can build an informed foundation for the enjoyment of art. Lessons also serve as a channel to express themselves freely. The art sessions are definitely created for art and fun lovers!

## Inquiring Minds

This will be a series of classes taught through a project-based inquiry model of learning that includes creative writing, art, crafts, Science, History and games.

Each week will be a different theme:

Week 1: Jurassic Park

Week 2: World War 2

Week 3: Space

Children can opt to do all three weeks or just pick one of the weeks where the theme is of interest to them. They will not only investigate the weekly theme but also come away with increased knowledge in each of these fascinating topics!

## Science Nerds - STEM LAB

Young children come across uncountable machines in their everyday life, often without understanding how they work.

The conveyor belt at the airport, the turnstile in front of supermarkets, the elevator that takes them up and down... all these moveable objects might seem like magic to them.

In this workshop, children will not only see how these things work, but they will also get to build their own and learn how to make these machines move!

They will also get to take their machines home to share with their families.

## Let's Dance (with professional dance instructors)

Professionally trained instructors will educate the young dancers in a positive and motivational environment through "tried and true" programmes that ensure "step by step" success.

Children will learn techniques just like the professionals in the following forms of dance:

- Tap
- Jazz
- Hip Hop
- Ballet

On completion of at least 10 classes, students will receive a certificate of completion.

## Mandarin

These classes aim to excite our children in the learning of a language and will be taught by a native Mandarin speaker and trained teacher. They will include daily conversation practice, Storytelling and role play (with drama!), as well as many fun games to support the learning of Chinese characters and vocabulary.

In addition, there will be opportunities for the children to learn some traditional Chinese art and calligraphy.

Any level of Mandarin is accepted – from beginners to native speakers!
